

**Multi room settings.  
Protocols for support and intervention - Full and Interim  
Review visits.**

- During the initial contact agreement should be reached as to which room the EYC/EYO will focus on during the visit.
- In order to gain a comprehensive overview of the setting the visit must begin with a tour of each room in the setting.
- During the tour the EYC/EYO might identify the need to spend time in an additional room or to change the focus of the visit with the agreement of the owner/manager.
- To clarify, there is no expectation that an EYC/EYO should observe in all rooms of the setting.
- Subsequent visits may be required to focus on the other rooms.
