Digital preservation roadshow

Case study: Gloucestershire Archives ingest packager

Viv Cothey
Case study: GAip
some background

• need for a practical and relevant response ...
• be small scale and low-no cost
• be flexible and offer opportunities for
  – learning about digital curation
  – exploring the issues
  – gaining use experience, and
  – advocacy
Case study: GAip learning about digital curation

“ensuring access to information beyond its operational environment”
Case study: GAip learning about digital curation

• beyond data security
• beyond business recovery
• beyond ERDMS
• beyond digital libraries/repositories
• need a post–Microsoft® point of view
• ...

Gloucestershire County Council
Case study: GAip exploring the issues

- GAip is a desktop tool that automates the process of constructing an “ingest package”
- it is open and explicit in how/what it does
- it is based on,
  - immediate migration to a preservation format
  - intrinsic metadata
Case study: GAip gaining use experience
Case study: GAip exploring the issues
Case study: GAip exploring the issues
Case study: GAip
gaining use experience
Case study: GAip gaining use experience

- intellectual property implications
- digitisation colour profile
- Ivor Gurney collection publication
- the Turtle collection cataloging
- open source
Case study: GAip advocacy

Digital curation is more than just preserving the data.

It is about preserving access to the information.
Case study: GAip advocacy

• both internal and external
• no “silver bullet”
• “information lifecycle”
• 100 year point of view
Case study: GAip advocacy
Case study: GAip
next steps

• “sword”
• “trusted digital store”
