% of Healthy Lifestyles customers demonstrating a significant improvement in their mental wellbeing score	Bigger is Better				75.0 %	82.0 %	A target for this indicator will be set for 2018/19 using this years performance as a baseline measure. The service continues to build on last quarters excellent achievement of 75% - this demonstrates that those entering the service for support to change a lifestyle behaviour are also seeing an increase in their mental wellbeing.		Publicly Reported
% of all Healthy Lifestyles customers who achieve a significant risk factor improvement	Bigger is Better				31.7 %	73.0 %	This is a new indicator and we are setting a baseline in year 1. The figure in Q2 is significantly higher than Q1 due to the way the indicator was calculated and that we were agreeing thresholds in Q1 so not all data were included in the total.  This is a really solid performance with nearly 73% of those completing their programme of support with the service achieving a significant improvement.		Publicly Reported

Number of complaints/reports of scam activity against vulnerable individuals (includes doorstep crime)	Bigger is Better					83	160	190	▲ The target is based on the number of reports receive last year. The number of reports received is entirely dependant on referrals from other services, mainly Adult Social Care, The Police and the national call centre who act as the first point of contact between the public and all Trading Standards Services across the country. This is the second quarter the figures are below target. Further analysis of the source of complaints is required to see whether this is a general downturn in reporting by all our partners or whether there is any particular partner providing fewer reports. We will then have to determine whether we can influence the level of reporting or whether we have to review our target to reflect a realistic level of information into this Service.
