

## Covid Rapid Testing in schools – what it might be like for me

I might need to have a **Covid Test** at school. The tests are sometimes called **Rapid or Lateral Flow Tests**. They are called this as they give the results quickly.

The results look like this.

An **adult will explain** what I need to do for the testing process.

The test will need me to **rub a small swab**, a bit like this one

inside **my nose**

an **adult will tell me how** to do this.

It might feel a bit unusual, but **it will be ok**

Here is a link to a video of school Covid rapid testing
