

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required?

The definitive path passes through a farmyard where large farm vehicles and lorries operate, particularly at harvest time in autumn, so caution is advised when passing through the farmyard. The site is level. Some sections of the path could be muddy in wet weather.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

The farm grows and stores arable crops, and horses are kept in a stable area adjacent to the farmyard. Other than horses, it is not anticipated that there would be any exposure to animals.

3. Is the site remote and/or can it be seen from other highways or rights of way?

The site is fairly remote and is accessed from a concrete farm track. However, the definitive and proposed routes are close to the farmhouse, and there are generally farm workers and vehicle operatives working in the vicinity of the farmyard.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

The mobile signal is unreliable and there is no public telephone box in the vicinity. However, the farmyard and farmhouse are close by should emergency services be required.

5. Is the right of way easily accessible? Will arrangements for access by the Inspector need to be made in advance?

The right of way is easily accessible, and parking is available in the stable yard adjacent to the farmyard, however it is recommended that access is arranged in advance of a visit.

6. Are there any dangerous pieces of equipment or substances stored at any point along the right of way?

No, although the right of way passes through a farmyard where farm vehicles and lorries operate.

7. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

No.
