Information for people with a visual impairment

This leaflet summarises resources and support available in Gloucestershire to people with a visual impairment, and gives details of how to find out more. **This information sheet is also available in large print.**

Local Authority Resources

Sensory Services Team

Social care staff can give advice, support, skills training and information to visually impaired people, their families and carers. We aim to make you as independent as possible. If you wish, we can provide links to other organisations that support visually impaired people.

We can also provide rehabilitation, specialist equipment, and other services such as mobility training. The support you receive will depend on an assessment of your needs. Together, we can discuss what you want to achieve, and what support and aids would be appropriate.

There is no charge for help from Health or Sensory Services fieldwork staff. Following your assessment, you may be required to make a financial contribution towards some services, based on your ability to pay.
