

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required?

Part of the proposed path is on an incline through a grassy field. A small section between F and G (currently unfenced) is near a cattle drinking trough and the ground might be uneven.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

Part of the proposed path runs through a field that is sometimes grazed by cattle.

3. Is the site remote and/or can it be seen from other highways or rights of way?

The definitive path runs through the garden of a dwelling house, although there are no other properties in the vicinity. Part of the proposed path can be seen from the road; the remainder is approximately 225 metres away from the road and connects to another footpath approximately 240 metres to the east.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

The site is fairly remote and is located off a single track road. The mobile phone signal is unreliable and there is no public telephone box in the vicinity. The nearest village, Sheepscombe, is approximately 1km to the southeast via public footpaths or the single track road.

5. Is the right of way easily accessible? Will arrangements for access by the Inspector need to be made in advance?

The definitive and proposed paths are easily accessible, and the proposed path is currently in use on a permissive basis. However, there is no parking available on the single track road and it is recommended that arrangements are made for the Inspector to park on the applicant's driveway.

6. Are there any dangerous pieces of equipment or substances stored at any point along the right of way?

No.

7. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

N/A
