

## **Statement from Portfolio Holders – Cllr Carole Allaway-Martin**

“The role of adult social care is to provide quality services for adults in need of care and support, working with them to ensure their well-being, independence and dignity are upheld. We welcome the opportunity brought about by the new regulatory framework for assessment of adult social care. It will increase transparency for our communities and will help shine a light on the good work that happens across the Council and the wider health and care system in Gloucestershire. It will also assist us in developing future priorities for services”.
