

**Alterations Notices Issued by GFRS under the Regulatory Reform (Fire Safety) Order 2005**

Premise Ref	Alt Notice Ref No	Date Served	Premise Name & Address	Matters specified remedied? (Date)	Reason for Notice
00046240	320	05 Jun 2023	<b>MB Electrical</b> 174 Southgate Street Gloucester GL1 2EZ	<b>In Force</b>	Inadequate levels of fire resisting compartmentation between the commercial side and the residential side of the premises. The means of escape from the residential side of the premises is not a protected route to a place of ultimate safety. You must notify this authority before you: Allow any persons to use any part of the premises for residential or sleeping purposes.

00017560	319	12 Apr 2023	<b>T-Level Building</b> Cirencester College Stroud road Cirencester GL7 1XA	<b>In Force</b>	The fire engineering within the building may not work as intended if the fire-loading at the base of the atrium is not controlled. Combustible materials must not exceed the level as indicated within the fire strategy provided to this authority during the design consultation. Combustible materials and ignition sources must be kept within this modelling to ensure that the smoke extraction system can cope with the volume of smoke for long enough to allow all relevant persons time to safely evacuate.
