

Never mind the technology,
what about the exit plans?

Viv Cothey

Gloucestershire Archives

Why this presentation?

Some technology

file, block, object, tracks, partitions, volumes...
tape, LTO, “spinning rust”, SMR, SSD...
ZFS, RAID, “bit-rot”, 2FA, NAS, SAN...
“durability”, eleven 9s, off-site backup...

Nothing to see here – move along

But, note

“redundancy” and “end-of-life”...

As/ Dom 1528
The viijth day of June was married Thomas
Woodward and Anne Synt.

250

As/ Dom 1569

“Bishop’s transcript” – Kembley 1569

End-of-life:
need for a succession of
information systems

“Digital” versus “analogue”:

challenge #1: “survival”

challenge #2: “authenticity”

Authentic preservation:

being able to demonstrate
that information has survived

Exit plans (orderly):

audit, and
verify “authenticity”

Institutional / organisational
“failure”:

Carillion!

Exit plans (disorderly):
information “redundancy”

Thank you
