

Lydney Cycle Improvement Scheme

Bulletin 1 – 7th November 2019

Griffiths have been appointed by Gloucestershire County Council to carry out the Lydney Cycle Improvement Scheme. We will construct an integrated cycleway network made up of five individual links aiming to improve connectivity for cyclists and pedestrians throughout Lydney and the surrounding areas. The scheme will provide safe, easy to ride routes suitable for utility, leisure and commuting.

Lydney Cycle Improvement Scheme Routes

Progress So Far...

Site Compound

Our site compound was set up on the A48 Bypass as a central hub for our work over the next few months.

Red Link

We have started work on the southern end of the A48 working from Aylburton toward Lydney to create a shared use cycleway and footway.

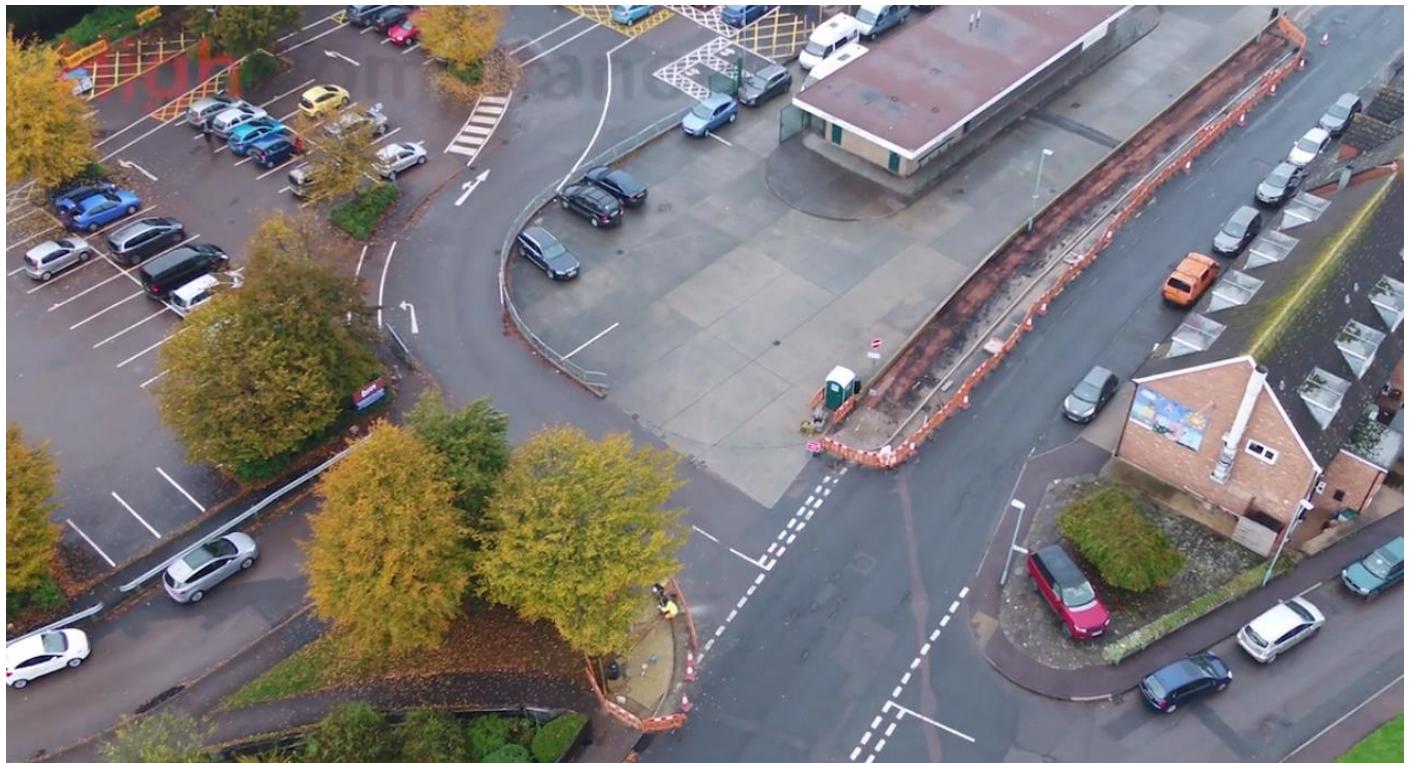

We have also widened the existing footway at the southern end of Lydney toward the town centre

Orange Link

We have started to widen the footway at the northern end of the orange route near the bus station.

Green Link

Works have started on the green link on Church Road to widen to footways, which is nearly complete. We have installed 4-way lights at Church Road junction with High street to allow us to safely carry out the widening works and will remain in place until the weekend.

Upcoming Works...

Red Link

We will be continuing to work at the southern end of the Red Link at Ayleburton over the next week before we start moving north, closer to Lydney.

Following completion of the works on Church Road junction with High Street we will start working on High Street toward Aylburton to widen footways and build a retaining wall.

Orange Link

Work will continue over the next two weeks on Hams Road as we work toward Newerne Street.

Green Link

We will be continuing to work on Church Road to install bollards, street signs and surfacing.

As we progress with these important improvements, your patience is greatly appreciated.

If you have any concerns or issues regarding the improvement scheme, please contact me on 03301 071484*. I will be available throughout the construction phase to provide continuous engagement with businesses and residents within the local area.
