## Contribution reviews policy

Effective date of policy	1 April 2023
Date approved	2 March 2023
Next review	31 March 2026

### 1 Introduction

The purpose of this policy is to set out the administering authority's approach to reviewing contribution rates between triennial valuations.

It should be noted that this statement is not exhaustive and individual circumstances may be taken into consideration where appropriate.

#### 1.1 Aims and objectives

The administering authority's aims and objectives related to this policy are as follows:

- To provide employers with clarity around the circumstances where contribution rates may be reviewed between valuations.
- To outline specific circumstances where contribution rates will not be reviewed.

#### 1.2 Background

The Fund may amend contribution rates between valuations for 'significant change' to the liabilities or covenant of an employer.

Such reviews may be instigated by the fund or at the request of a participating employer.

Any review may require increased contributions from the employer.

#### 1.3 Guidance and regulatory framework

The Local Government Pension Scheme Regulations 2013 (as amended) set out the way in which LGPS Funds should determine employer contributions, including the following;

- Regulation 64 (4) – allows the administering authority to review the contribution rate if it becomes likely that an employer will cease participation in the fund, with a view to ensuring that the employer is fully funded at the expected exit date.
- Regulation 64A - sets out specific circumstances where the administering authority may revise contributions between valuations.

### 2 Statement of principles

This Statement of Principles covers review of contributions between valuations. Each case will be treated on its own merits, but in general:

- The administering authority reserve the right to review contributions in line with the provisions set out in the LGPS Regulations.
- Employers will be consulted during the review period.

- Full justification for any change in contributions rates will be provided to employers.
- Advice will be taken from the fund actuary in respect of any review of contribution rates.
- Any revision to contribution rates will be reflected in the Rates & Adjustment certificate.

## 3 Policy

### 3.1 Circumstances for review

The Fund would consider the following circumstances as a potential trigger for review:

- in the opinion of an administering authority there are circumstances which make it likely that an employer (including an admission body) will become an exiting employer sooner than anticipated at the last valuation;
- an employer is approaching exit from the scheme within the next two years and before completion of the next valuation;
- there are changes to the benefit structure set out in the LGPS Regulations which have not been allowed for at the last valuation;
- it appears likely to the administering authority that the amount of the liabilities arising or likely to arise for an employer or employers has changed significantly since the last valuation;
- it appears likely to the administering authority that there has been a significant change in the ability of an employer or employers to meet their obligations (ie a material change in employer covenant);
- it appears to the administering authority that the membership of the employer has changed materially such as bulk transfers, significant reductions to payroll or large-scale restructuring; or
- where an employer has failed to pay contributions or has not arranged appropriate security as required by the administering authority.

### 3.2 Employer requests

The administering authority will also consider a request from any employer to review contributions where the employer has undertaken to meet the costs of that review and sets out the reasoning for the review (which would be expected to fall into one of the above categories, such as a belief that their covenant has changed materially or they are going through a significant restructuring impacting their membership).

### 3.3 Effect of market volatility

Except in circumstances such as an employer nearing cessation, the administering authority will not consider market volatility or changes to asset values as a basis for a change in contributions outside a formal valuation.

### 3.4 Documentation

Where revisions to contribution rates are necessary, the fund will provide the employer with a note of the information used to determine these, including:

- Explanation of the key factors leading to the need for a review of the contribution rates, including, if appropriate, the updated funding position.
- A note of the new contribution rates and effective date of these
- Date of next review

The Rates & Adjustments certificate will be updated to reflect the revised contribution rates.

## 4 Related Policies

The fund's approach to setting employer contribution rates is set out in the Funding Strategy Statement, specifically "Section 2 – How does the fund calculate employer contributions?".
