

Mental maths questions for money

Below are a set of mental maths questions focusing on money and all of the number operations

1. A group of fishermen sold their old boat for £25. They are saving to buy a new one which costs £180. How much more money do they need to raise?
2. A fisherman buys three pairs of fishing socks for £9.50 each. How much does he spend?
3. Three friends are buying an elver net to share. The net costs £51.00. How much must each of them pay?
4. A cheap pair of fishing gloves costs £4.99. An expensive pair costs £29.99. What is the price difference?
5. A fishing tackle box costs £20.00. James saves £2.50 each week. How many weeks does it take him to afford the tackle box?
6. A salmon fishing club charges a £5.00 fee per fishing session for each member throughout the fishing season. If the club arranges 18 fishing sessions a season, how much money in fishing fees does each fisherman in the club pay?
7. Membership costs £60.00 per adult to join a local fishing club. Students get a 30% reduction. How much do they pay?
8. A 1-day fishing licence costs £10. There are 15,000 licences sold during the year. How much money has been made from the fishermen?
9. A fisherman is paid £4 for every 5 eels he catches. If he catches 500 eels over four consecutive weeks, how much did he earn that month?
10. A fishing syndicate pays three of its fishing bailiffs £20 per month, four bailiffs £25 per month, four bailiffs £30 per month and four bailiffs £40 per month. How much does this cost the club each month?
