

# South of Roundabout from M5

## Approach to Roundabout from M5

The approach to the roundabout from the M5 and Stonehouse will be widened to three lanes from the existing two lanes. This will greatly improve vehicle capacity and reduce queues between the M5 and Cross Keys Roundabout. The roundabout itself will also be widened to accommodate the extra lanes on its approach.

Additionally, a new wider shared use footway will be installed to cater for pedestrians and cyclists. As part of these works a new retaining wall will be built, along with works to the embankment into the fields to the west.
