Arle Court Transport Hub

**Expanding and improving services and facilities to
deliver a modern transport hub in Cheltenham**

April 2024

Welcome to our fourth community newsletter, updating you on construction of the new Arle Court Transport Hub.

Once complete, the upgraded transport hub will offer regular bus services to Cheltenham and Gloucester and better connections to local sustainable transport options. It will also provide a range of new and improved facilities on site including:

- An 860 space four-storey car park, compared with 576 spaces previously
- Passenger terminal with indoor waiting area and a covered outdoor waiting area; real-time passenger information screens; driver rest room facility; customer information desk; toilet (including a dedicated Changing Places toilet) and changing facilities
- Café space allocation (with utility supplies only)
- Electric Vehicle Charging Points (EVCPs) in the multistorey car park. The car park has been future proofed to enable expansion of up to 266 (7kW) EVCPs.
- Four high speed rapid charging points
- Cycle and e-scooter hub
- Drop-off and pick-up point, parking for up to ten coaches and camper vans

**Funded by
UK Government**

Current progress

Construction of the hub is due to be completed this summer, with the final west car park works expected to finish in the autumn.

At the moment, finishing trades are on-site installing kerbs and laying paving. They are also planting new trees and hedgerows in the outside space.

Internally, the passenger facilities are being plastered and painted. The car park area is also progressing well, with vehicle barriers, signage and walkways currently being installed.

Power will soon be on to the building, with testing and commissioning of the installation to follow.

The scheme is being funded by UK Government's Housing Infrastructure Fund (HIF), administered by Homes England, and by Gloucestershire County Council.

Site opening hours

09:00 – 17:00 Monday – Friday
