

Self Update Provider Portal

- The Self Update Provider Portal is a secure digital method of collecting data from providers. This should be completed and updated regularly as it forms part of the Local Provider Agreement and is part of the Gloucestershire County Council EY Funding audit process.
- The information you put into the Self Update Portal is used to support the annual Early Years census statutory return. It also filters through to the GlosFamilies Directory website, providing information for prospective parents.
- The SUPP and EY census sections are 2 separate operations within the 'self update' area of the portal.

Welcome to the Self Update Provider Portal (SUPP)

Please remember to update your capacity details on a termly basis.
