Assessment

Prompt: use plain, caring, family-friendly language. Capture what people have said, not professional assumptions.

3. What we know and what matters

About me

What am I good at, what do people like about me?

Kane is a lovely child in the setting. He can give wonderful hugs. He can sometimes need help with leaving his Mum but settles down with some distractions. Kane says he likes blue paint and gets upset when leaving home. He likes to play with sand and water.

What help would I like?

What I want to be different and what would help me?

Kane is struggling with transitioning into nursery. He has become very physical especially towards his brother. This is now extending towards staff in the nursery as well as parents.

Family voice

What the family wants to change and what feels helpful?

Mr & Mrs Cobb find Kane's behaviour is more spikey and unpredictable. Some mornings he can be much more regulated than others. Mrs Cobb's Mum is helping with the school & nursery run.

What has already been tried?

Support, adjustments, other plans and assessments in progress, informal help and impact so far.

Mrs Cobb brings Kane into nursery and is open to help. Mr & Mrs Cobb have been using Now and Next & Visual Timetable.

How will this plan improve our family's life?

Describe clear changes in everyday life.

Getting into nursery without such a fuss and calmer hands at home. Calmer hands at home and in the nursery.

4. What is the child's story and why are we writing a plan?

Briefly describe what has led to this plan, using the child, young person's and family's own words wherever possible. Include strengths, what has changed, what people are worried about, significant events, what support has already been tried and why a coordinated plan is needed now. Include detail on Education, Child or Family Health needs, Relationships, Family and Community Factors. Note how these factors affect everyday life, learning, relationships or participation.

Kane has recently joined the Nursery which is attached to a primary school. Kane has shown quite a lot of distress when leaving home and transitioning into the nursery. The nursery shares an entrance with the school and Kane seems to be struggling with some of the noise at the start of the day. Mrs Cobb reports that Kane can be 'rowdy' and very physical with his play at home and his brother avoids playing with him because of this.

From the first Plan review we can see when Kane has guided time with an adult he tends to be more focussed on the task and better able to manage transitions. He is eating well in the setting. Without supervision he can be more physical and hurt people to get the things he wants. Mrs Cobb's Mum is helping with the school & nursery run. Kane will be unhappy if his Mum doesn't bring him in but he transitions okay with his gran most days.

This is the second review.

Plan

Record the priority needs, outcomes and actions. Keep the plan focused on the few things that matter most.
