

Traffic Management

General Traffic Management

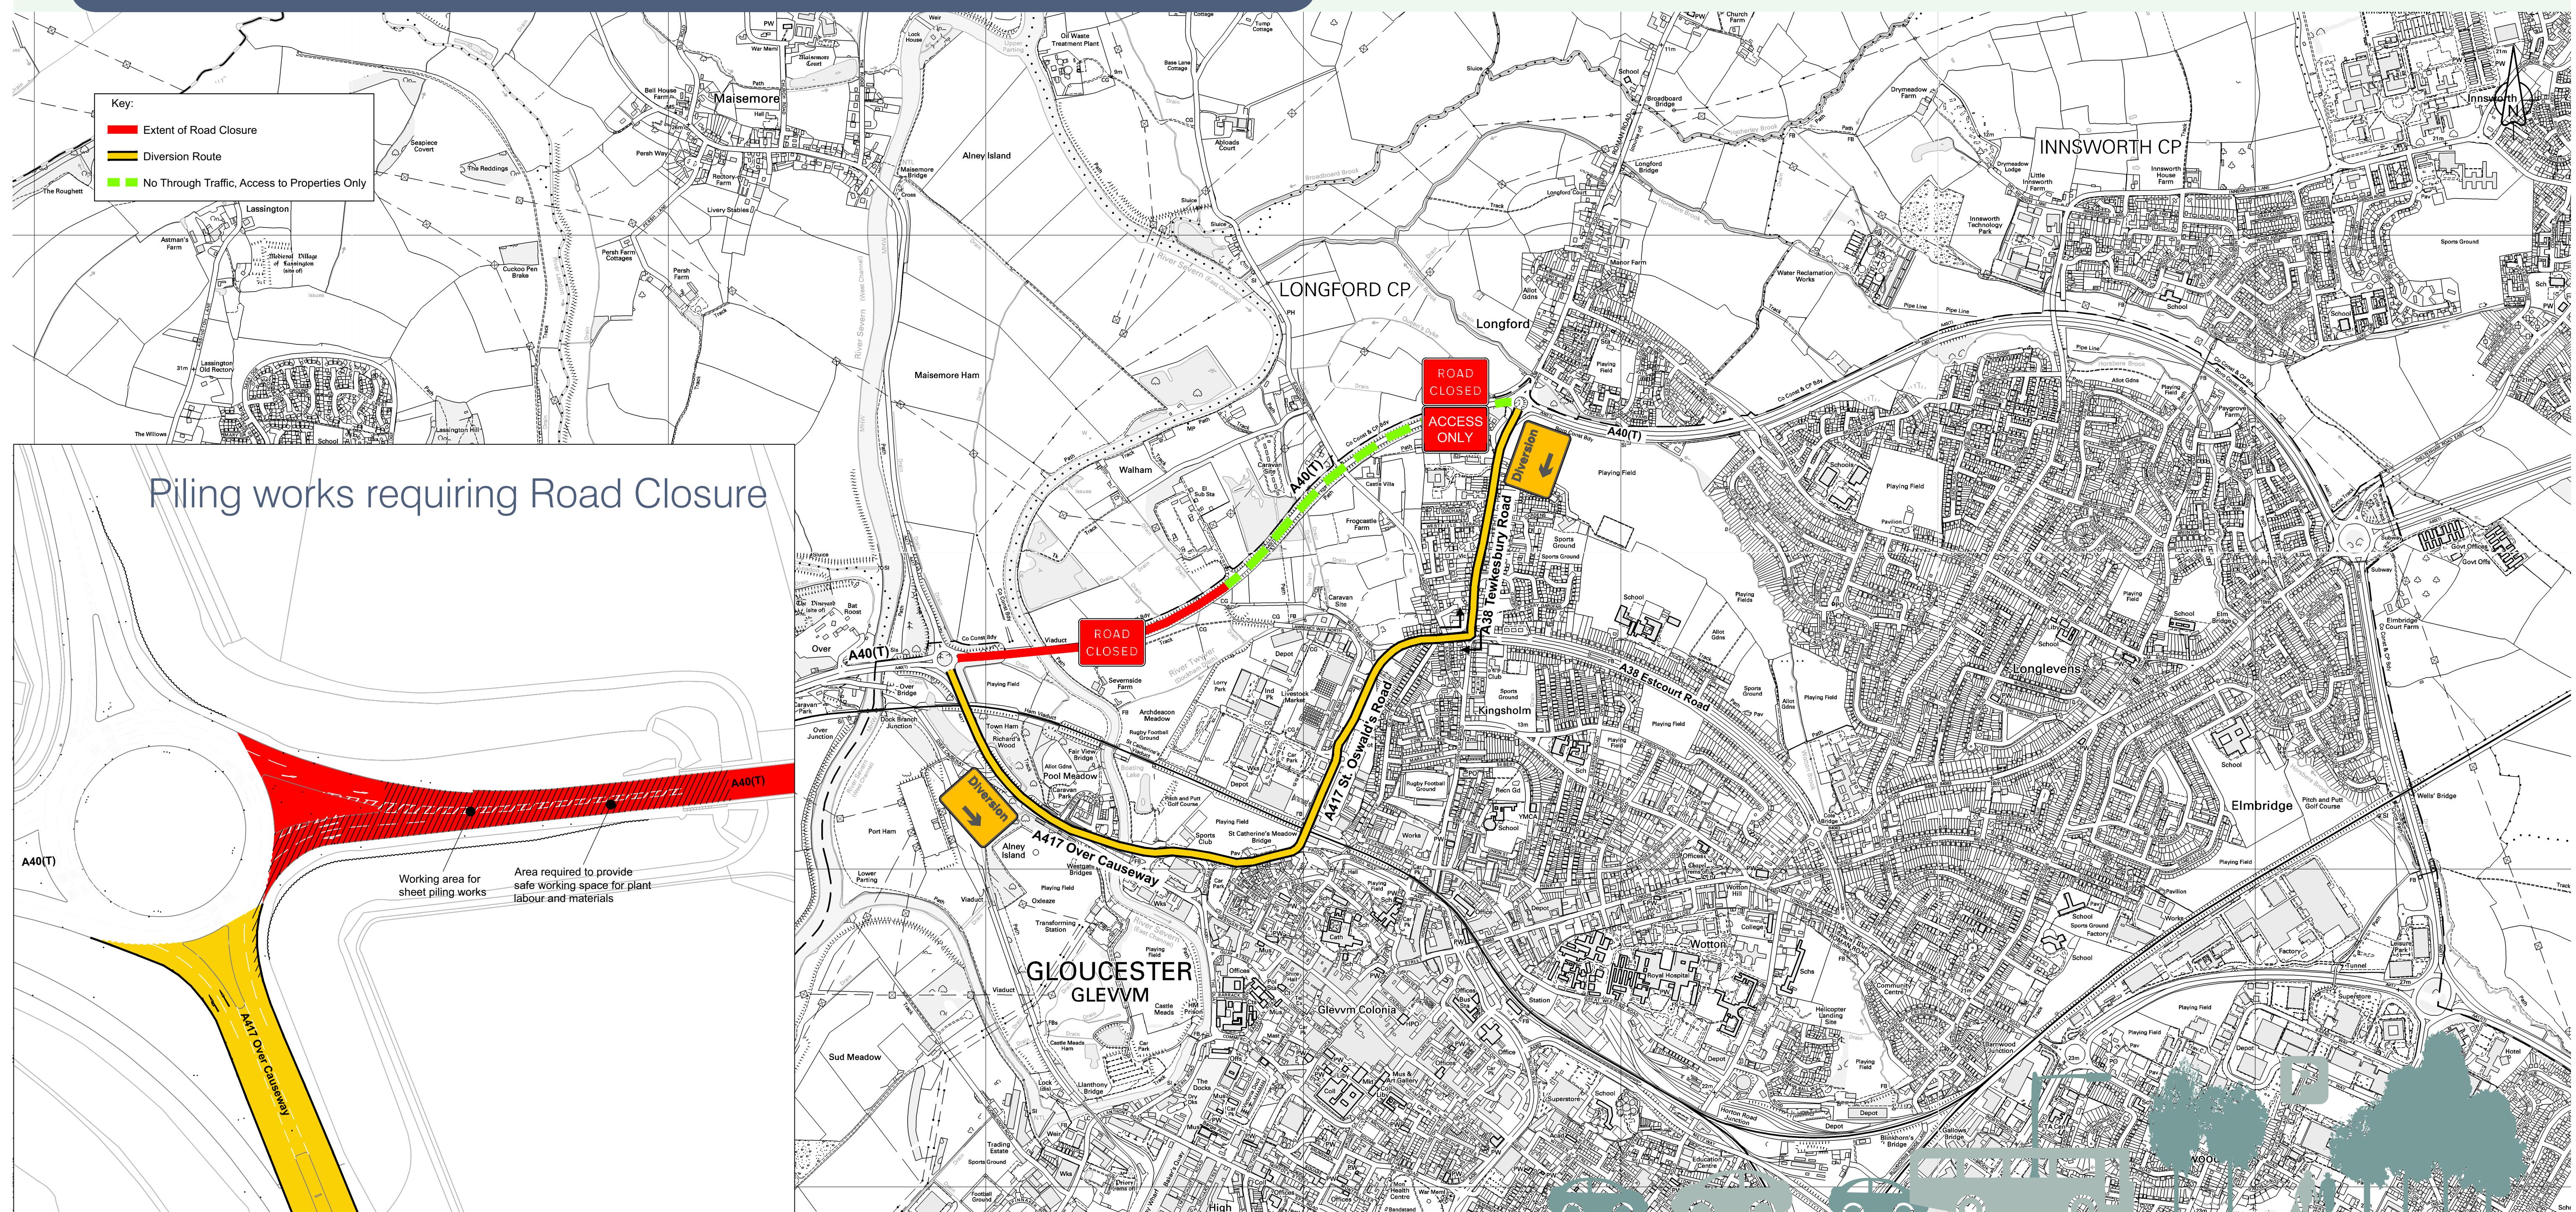

The exact extent and duration of the various traffic management layout can only be decided once we have appointed a contractor and agree the latest method of working. Having said that we would anticipate the following:-

- During the works all existing traffic lanes will be open during peak hours (7.00am to 9.30am in the morning and 3.30pm to 6.00pm in the evening). During non peak daytime hours (9.30 to 3.30pm), the western and southern approaches will each in turn be reduced to single lane approaches.
- During the construction of the widened circulatory carriageway one operational lane will be removed on all approaches to the roundabout during non-peak hours (9.30am to 3.30pm).

Please note:

- Construction of the new sheet piled walls will require full night time closures. The night time closures will affect the westbound (see detail A below) and southbound approaches (see detail B on next board) in turn and will last approximately 3 weeks each.
- Road closures are essential to ensure the safety of the site staff.

Detail A - Westbound Piling Works - A40 Diversion
