

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required?

Quarry and 2 houses – not possible to walk majority of Order route. Short section behind houses can be inspected via the class 6 highway adjacent to No's 67 & 52 Rosedale Avenue. The northern section of Order route can be inspected and walked from point A to point B and for approx.. 40m beyond.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

No.

3. Is the site remote and/or can it be seen from other highways or rights of way?

The Order route is located in a rural location to the north and residential to the south. Would not consider it to be remote, however.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

Yes.

5. Is the right of way easily accessible? Will arrangements for access by the Inspector need to be made in advance?

Please see my answer to point 1. Order route is an existing PROW and can be accessed by other PROWs or class 6 highway adjacent to Rosedale Avenue.

6. Are there any dangerous pieces of equipment or substances stored at any point along the right of way?

Not along the Order Route or any official PROWs.

7. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?
