

Advance Notice: Overnight Road Closure of Great Western Road

Dear Resident or Business Owner,

We are writing to let you know about upcoming overnight works that will require temporary changes to road access and traffic arrangements in your area.

Great Western Road junction with London Road

- Great Western Road will be closed to traffic overnight from 8pm on 22nd July and will reopen at 5am on 23rd July.
- Pedestrian footpath access will remain open during the closure.

Why are these works happening?

These works form part of the wider improvement scheme at the Great Western Road junction with London Road. New street lighting and Belisha Beacons will be installed to improve safety for pedestrians and road users.

Further overnight closures will be needed to install ducting across the carriageway and complete carriageway resurfacing. These works are expected to take place between late July and early August, and we will share confirmed dates as soon as they are available.

These works have been approved by Gloucestershire County Council.

We understand that road closures can be disruptive, particularly for residents and local businesses, and we apologise for any inconvenience caused. Thank you for your patience and understanding while these important improvements are carried out.

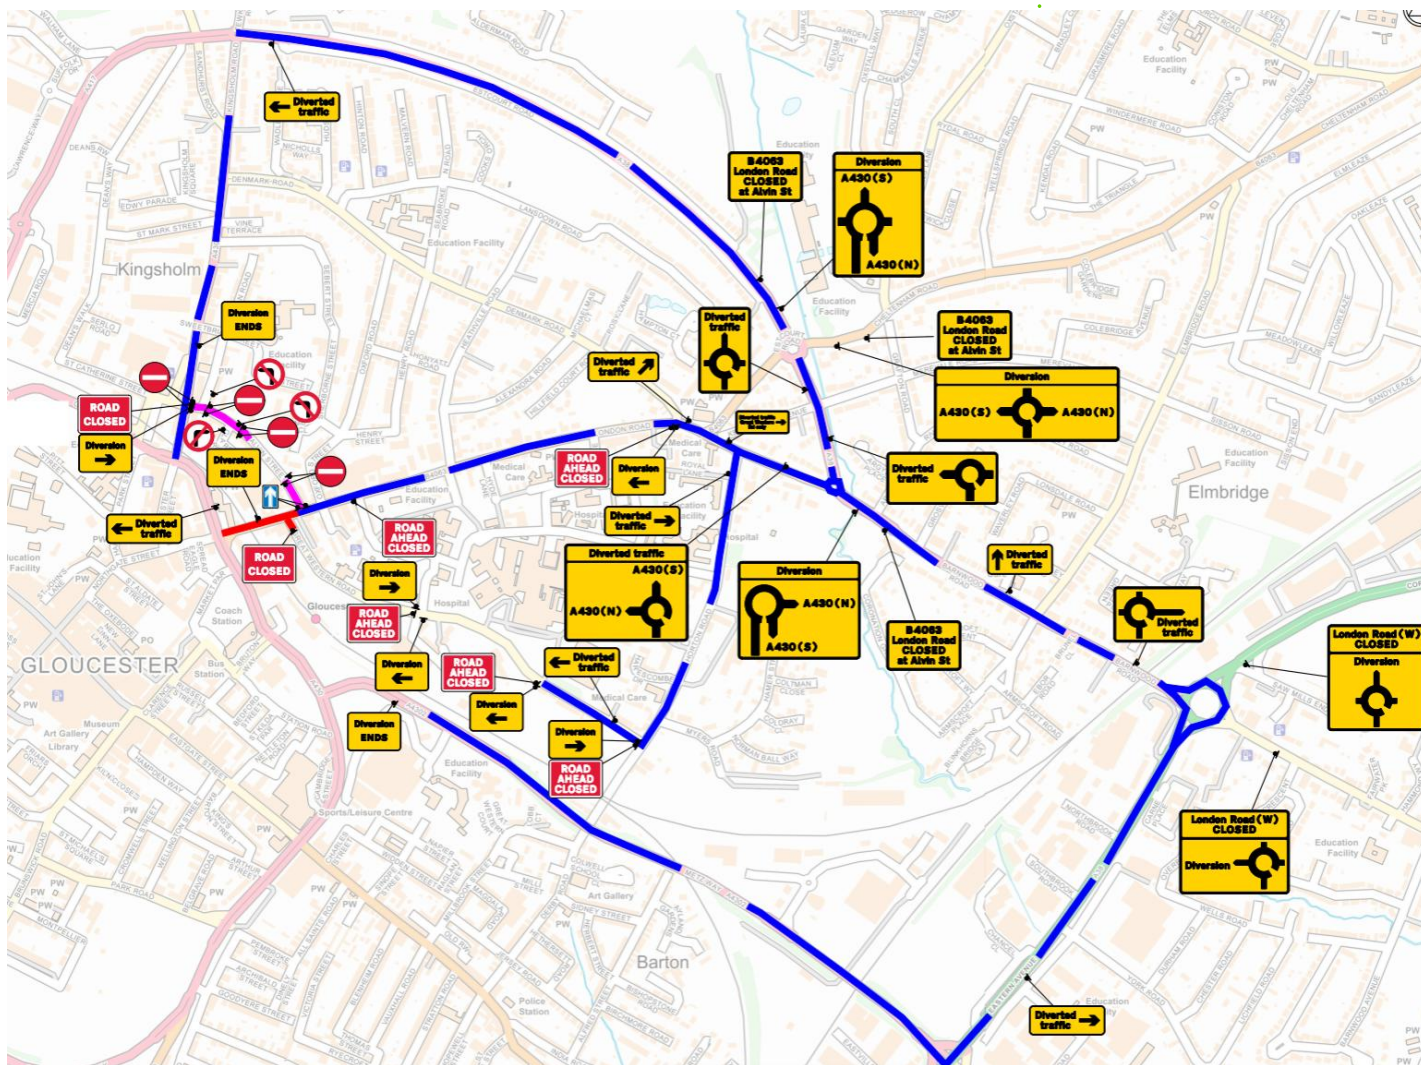

If you have any questions or concerns, please contact us at blackdogway@montel-group.com or Gloucestershire County Council at majorprojects@gloucestershire.gov.uk

Kind regards,

Montel Civil Engineering Team
