

CLAIMANT COUNT DATA

for May 2024

June 11th Release

The Claimant Count is a measure of the number of people who are unemployed and claiming benefits. From 1996 until the recent introduction of Universal Credit, this was based on the number of people claiming Jobseeker's Allowance. However, since its introduction some unemployment benefit claimants will be claiming Universal Credit instead. To reflect this change, the Claimant Count has been expanded to include people claiming Jobseeker's Allowance plus those who claim Universal Credit and who are searching for work.

Gloucestershire is in the process of transitioning to full Universal Credit. This means a broader span of claimants will be required to look for work than previously under Jobseekers Allowance. As more people are brought within the coverage of Universal Credit, the Claimant Count is set to rise noticeably over time. This will happen irrespective of how the economy performs and is a feature of the design of Universal Credit which brings additional groups of people into 'Searching for Work' conditionality (and therefore the Claimant Count), to help encourage and support these claimants into work.

For more information about Universal Credit please see the [ONS website](#).

The Claimant Count* in the County increased by 60 persons to 10,270 a rate of 2.6%.

* **Feb - Apr 2024 unemployment rate:**

From 13 February 2024, ONS has reinstated reweighted Labour Force Survey (LFS) estimates.

Notes from ONS:

- The new reweighted LFS estimates incorporate our latest estimates of the size and composition of the UK population, improving the representativeness of our LFS estimates - these will replace the experimental estimates we have been publishing since October 2023.
- We show the indicative impacts of this reweighting from the period July to September 2022 onwards for the headline levels and rates of employment, unemployment and economic inactivity; the publication on 13 February will include revised historical estimates back to 2011 for these measures.

For further information, please see the ONS' Impact of reweighting on Labour Force Survey key indicators article:
